ARGENBRIGHT SECURITY EUROPE LIMITED

Making Communities Safer

www.aseL.co.uk

ASEL is a market leader in identifying, analysing and managing risk, delivering integrated security solutions across the UK and Europe. We combine people, technology and intelligence to create safer environments for organisations, their assets and the communities they serve.

Our approach is built on innovation and insight. By harnessing dynamic data sources alongside industry expertise, we design and deliver truly bespoke security solutions that are both effective and cost-efficient.

ASEL is part of the Argenbright Holdings Group, a privately owned \$2.1bn organisation founded by Frank A. Argenbright Jr. in 1979 and headquartered in Atlanta, Georgia. Since its inception, The Argenbright Group has been continuously transforming intensive essential frontline services, with the principal aim of providing a legendary service to its customers

Argenbright Group

By seamlessly aligning these services, we provide a unified security strategy tailored to each client's needs, ensuring optimal protection, efficiency and return on investment.

Risk Advisory & Intelligence

Security Technology

Technology plays a critical role in modern security environments. ASEL work with our clients to develop a truly bespoke and tailored suite of technology products and systems, seamlessly integrating with existing infrastructure or added as new, depending on requirement. These technologies are implemented by an in-house team of dynamic, multi-disciplined engineers, who are deployed virtually or in-person, across client estates.

Our technology solutions include:

**CCTV and intruder
alarms**

**Fire and life safety
solutions**

**Argus Vizion – Live
Facial Recognition
Solution**

**Access control
systems**

**Argenbright UAV
Drone Services**

**Lone worker
protection**

By combining technology with human expertise, we create smarter, more responsive security ecosystems capable of detecting threats in real time.

Temporary Security

When immediate protection is required, our temporary security services provide fast, effective cover. From construction sites and vacant properties to critical national infrastructure and emergency scenarios,

we deploy tailored solutions that secure environments from day one.

These services include

**Our own security tower
the WASP (wireless alarm
site protection)**

Solar trailer

**Temporary alarms
and access control**

**Perimeter protection
systems**

Timelapse video

**Temporary security
grade fencing**

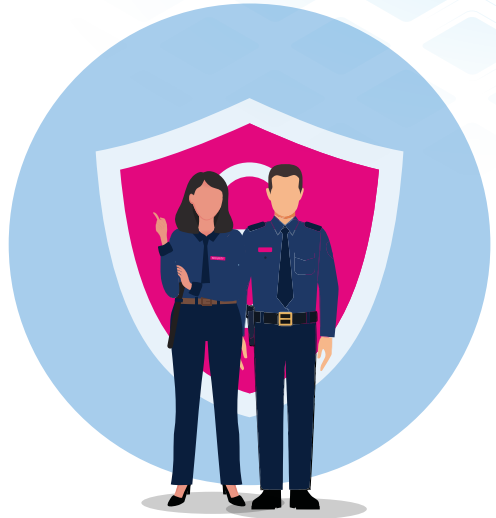

Our flexible approach ensures that security remains robust, even in dynamic or short-term environments.

Security Guarding

Our highly trained security professionals represent the visible and human element of your security strategy. Every officer is supported by robust training, clear processes and real-time intelligence, ensuring consistent and professional service delivery.

We provide guarding solutions across a wide range of sectors, adapting to complex environments and evolving risks. Our teams are not only a deterrent to crime but also ambassadors for safety, customer service and community reassurance.

Risk Advisory Practice

A pioneering and bespoke service

Assessing risk through advanced data analytics, our in-house advisory team transform raw data into actionable insights, helping organisations anticipate and mitigate potential risks.

Reducing risk without inflating cost

Our Risk Advisory Practice is the central pillar to our operating model and structure, designed to support clients through risk assessment, risk modelling and security assurance. Taking various strategic and dynamic metrics which assess external risks in combination with internal data, we are able to provide a comprehensive risk overview, which pinpoints specific drivers and recommends risk treatments from our human services and security technology solutions, creating a truly end-to-end service

Sector Expertise

We work across a diverse range of industries, tailoring our solutions to each sector's unique requirements, including:

Retail and commercial environments

Transport and logistics

Critical national infrastructure

Public sector and healthcare

Property and real estate

Business improvement districts and communities

Aviation

By understanding the nuances of each sector, we deliver security strategies that are both effective and commercially aligned.

Your Trusted Security Partner

ASEL is more than a service provider
we are a strategic partner. We work
closely with our clients to understand
their risks, design tailored solutions,
and continuously evolve security
strategies as threats change.
