

RAPID DEPLOYMENT

WASP

The WASP (Wireless Alarm Site Protection) is our revolutionary intruder detection system.

With 360° visibility, infrared motion sensors and a wealth of cutting-edge technological features to safeguard your site, this rapidly deployable solution is designed to provide protection in a wide range of environments.

Key Features

- + Full 360° coverage via four high-quality motion sensors.
- + 15m detection range across a complete 360° field.
- + Expandable slave cameras to eliminate blind spots.
- + Pre-recorded audio warnings for active deterrence.
- + Battery powered with integrated solar lid for continuous trickle charging.
- + Blue LED strobe lighting for high-visibility alerts.
- + Automatic LED floodlights triggered on detection.
- + Remote battery monitoring and GPS tracking for real-time oversight.
- + 24/7 monitoring by our in-house NSI Gold control room.
- + Drone integration capability for enhanced surveillance response.
- + Secured by Design accreditation.
- + Ability to link other products including:
 - Seismic monitor.
 - Smoke detector.
 - Heat sensor.
 - Water/ leak detection.
 - Fire alarms.
 - Door contact.

Coverage Options

- + Primary detection: 15m radius with full 360° coverage.
- + Extended coverage: up to an additional 15m per connected slave camera.

Additional Options

- + WASP X and WASP X with Smoke Screen are also available for indoor environments (see our separate product guide).
